## Introducing the Scapin 4' X 6' riser A new Standard

As we are always striving to meet the industry's needs, Scapin has created a new 4' X 6' compact and lighter riser. This new format developed and constructed in our workshop, can support loads up to 150 lbs./sq. ft. thanks to a denser 1" superior quality Russian plywood top. Although lighter and sturdier, our new riser uses the same proven aluminum alloy frame as our traditional Scapin riser. The hardwood contour surrounding the plywood allows it to be joined seamlessly to surrounding platforms using six dual locks and its shorten panel reduces deflection to offer better stability.

This new four-leg platform is easier to handle and reduces set up time making it the perfect riser for outdoor concerts and rough terrain. It is also compatible with our 4' X 8' risers and is offered for purchase or rental.

### Load rating :

- 150 lbs./sq. ft. \* or
- 650 lbs. on a 3" X 3" surface\* or
- 1 200 lbs. on a 6" X 6" surface in the middle of the platform \*

\* Load certified by an engineer

## Scapin at the JUNO Awards 2012

Scapin was part of the celebrations at the JUNO Awards in Ottawa on April 1st. We were selected to supply the Cyberhoist automation system as well as the technical risers and projection screens.

It was the JUNO's 41st anniversary but Scapin's 1st participation as an official supplier. Two spectacular stages at Scotiabank Place rocked with epic performances from Canada's musical elite. Scapin was proud to be associated with such a success.

Congratulations to all winners and nominees!
